Advanced Mobility / Kentucky Trailer  
500 Crossings Drive Suite A  
University Park, Illinois 60484  
U.S.A

This letter serves as certification announcement of Kentucky Trailer Mobile Medical Imaging in US as a mobile vendor for **GE SIGNA™ Voyager 1.5T Mobiles**.

**Program Title**      Advanced Mobility / Kentucky Trailer Mobile Design Certification

**Product Scope**    This certification only pertains to GE SIGNA™ Voyager 1.5T Mobile with TTD2-200A01 Northern-Air Chiller configuration.

**Protocols Completed**      GE engineering and field service teams completed the following on Kentucky Trailer mobile: 1. Pre-requisites; 2. Magnetic commissioning (cryovent, cryocooler, ramp, shim); 3. System staging; 4. System performance test; 5. Road test (4705 miles and system check); 6. Environmental test; 7. Acoustic test (scan room).

**Certification**            Based on the successfully completion of the above protocols on Kentucky Trailer mobile, Kentucky Trailer Mobile Medical Imaging is now certified to build GE SIGNA™ Voyager 1.5T Mobiles via their standard process. The GE field service team will run standard protocols after system installation and staging but no additional road/environmental tests will be required on future GE SIGNA™ Voyager 1.5T Mobiles built by Kentucky Trailer (unless new trailer design or product changes would require such test).

We at GEHC look forward to a long and successful partnership with Kentucky Trailer.

Thank you,

Jie Xue  
Global Manager, 1.5T MR
